CashFlow 7000 - o backup

Description

The MEI® CF 7000 has been the reliable choice in over 1.5 million operator installations since its release. As the industry's first coin manager goes beyond merely accepting and dispensing coins, it helps operators make informed decisions.

The MEI CashFlow® 7000 provides a low cost of ownership to operators. It is a low maintenance device that is built to last and perform. Features like unique tracking and diagnostic capabilities give operators the tools and information they need to better manage their cash and increase profits.

COIN CHANGER

Benefits

Faster Coin Acceptance. Next generation, patented coin sensing technology ensures industry-leading speed and more secure coin recognition and dispensing

Increased reliability. Three motors ensure increased reliability and continuous performance, even in the case of a jammed motor

More tube capacity. 6 tubes provide operators with 12% extra capacity, enhanced configuration options and increased flexibility

Easy updates and configuration. USB connectivity reduces at-machine update time

COIN CHANGER

Variants

G1: Payment Master

- Full audit capability
- Closed site payment
- Configuration via USB and PC
- Sonar tube measurement with auto-float

Accessories

STS Advance™

STS Advance™ provides operators with flexibility and control on machines that have SC family products integrated. It supports a full range of configuration and software update functions with user-friendly software and handheld tools so you can:

- Reconfigure new/multiple currency software and configuration data
- Monitor the performance of your Cashflow field base
- Collect unit performance and report audit data
- Support PPM and PPM Advance

STS Advance is designed to be user friendly with minimal training. You can meet your unique support needs quickly and easily.
