

CX25™

Description

The CX25™ is a robust coin dispenser offering years of reliable service and outstanding performance in high-volume environments. Located at most self-service and self-checkout applications, this coin dispenser accommodates high volumes of coin—typically up to 1,046 transactions before the CX25 requires refilling. This unit is available in different bin configurations to fit a variety of envelopes.

When looking for an effective coin management solution, think of the CX25 for optimized performance with a long life cycle. Ideal for banking and financial services applications like Multi-function ATMs and Money Transfer

COIN DISPENSER

Benefits

Low-maintenance efficiency. High capacity hopper requires less frequent fills minimizing downtime

High level of security. History of dispensed coins logged in firmware memory

Efficient and easy. Tilting bins for simple loading and emptying for effective cash management

Flexible design configurations. Four models to choose from: 3, 4, 6, or 8-bin hopper
