

currenza c² - old backup

Description

The currenza c²® is a superior coin changer that doubles as a coin recycler. All coins are eventually recycled and change to another customer. Known for its distinctive 6-tube system, this coin changer consistently delivers high performance with its unique MFT coin validation technology. The patented Payout Redundancy Protection coin dispensing system includes 3 independent payout motors to ensure that coin payout is always guaranteed, even if sales are lost.

All worldwide coins can be processed. Unique options such as the currenza c² spider, an integrated active coin sorting feature, makes this coin changer stand out in the market.

Please note, this product is not available in Europe
