3-in-1 Bezel - old backup

Description

Modular in design, the MEI CashFlow 3-in-1 cashless bezel is perfectly suited for cash and card-heavy environments. Considered a "Recycler-Ready" solution, its compact form gives operators the ability and space to deploy cashless and recycling technology in virtually any vending machine. This popular card reader mounts to an [MEI note validator](#) or works as a total solution with a validator included.

Combine with the Advance 5000 telemeter to comply with PCI PA-DSS requirements. The MEI 3-in-1 bezel gives operators confidence that their cashless solution meets the industry standards for security.

Accessories

Advance 5000

The [Advance 5000](#), also known as A5K, is CPI's telemetry solution that will add connectivity to your vending machine and handle the communication between your card reader and the Acquirer's bank, to guarantee a fast and secure transaction. PCI DSS certified when paired with an Advance 5000 telemeter.
