

NOTE VALIDATOR

 **CashCode**

GX™

Description

CashCode GX™ is a state-of-the-art banknote validator specially designed for use in payment and bank service kiosks. It combines a revolutionary validation platform that integrates multiple sensor sets with counterfeit detection algorithms running on powerful processors. CashCode GX provides a significant counterfeit protection, exceeding other banknote validators of the same category available on the market.

The CashCode GX is future proof with expanded memory and backwards compatibility with SM and MSM enables the CashCode GX to be deployed into kiosks to replace existing SM and MSM installations without kiosk rework. Save time with high-speed USB-ports through personal or tablet computer, flash card, mobile or implemented via a remote connection.
