

MSM - old for bac

Description

The CashCode MSM BackLoad is a multi-width bill validator designed to meet the needs of high volume, indoor and outdoor applications. Completes transaction in less than 2.5 seconds, this unit is widely deployed as part of payment systems in self-service kiosks across 35 countries, such as the Euro and Brazilian Real. The MSM BackLoad performs daily volume transactions of 500 or more bills.

A reliable self-centering mechanism and beltless transportation guides to perfectly center bills of different widths. This provides world-class acceptance to street grade bills or barcoded tickets and includes high security features for authentic validation and anti-stringing. The CashCode MSM BackLoad is ideal for financial services applications including Bill Pay Kiosks, Mobile Top-up Kiosks, Petrol Terminal Kiosks, Hospital Service Kiosks and Admission Kiosks.
