## eChoice™ EMV

### Description

---

The MEI eChoice™ EMV cashless bezel portfolio provides consumers the flexibility they demand at the point of sale. Three distinct designs gives the best solution for your business. Deliver the convenience that your customers expect with eChoice.

More payment options can lead to more sales when you accommodate customer purchases—accept whatever method of payment they choose. This popular card reader can mount to an existing [MEI note validator](#) or purchase a total solution with an included bill acceptor.

Combine with the Advance 5000® telemeter to meet PCI PA-DSS requirements. The MEI eChoice EMV cashless card reader gives operators confidence that their cashless solution meets the industry standards for security.

Reliable, secure, and EMV certified; the MEI eChoice card reader delivers the performance that you need for a complete connectivity solution.
