

Cyclone™ Hopper

COIN HOPPER

Cyclone™ Hopper

Description

The Cyclone Hopper handles most of the world's coin sets, but in a smaller footprint than other hoppers from CPI. It is ideal for applications where smaller coin capacities are required such as multi-pay gaming machines. The Cyclone coin hopper comes with the same attributes—including multi-currency support, high security, fast payout and proven reliability—of our larger coin hoppers.

There are three variants of this coin hopper: the standard Cyclone, the Cyclone Mid-Capacity and the Cyclone High Capacity. Each hopper has same features and interfaces, but different dimensions and coin capacities to fit your needs.

Benefits

High performance with payout of 10 coins per second

Global design. Accepts most of the world's coin sets

Flexible design. Wide range of configuration options

High security. Excellent fraud discrimination

COIN HOPPER
