

Talos™

NOTE VALIDATOR

Talos™

Description

With the Talos™ note validator, CPI presents the next generation of bill acceptance for the vending industry. Talos is the first of its kind to be equipped for connectivity and mobile diagnostics. CPI Synq™ enables at-machine diagnostics, troubleshooting, and configuration.

An enhancement of the legacy Series 2000™ platform, the Talos bill validator combines MEI VN reliability and performance, but 2x faster. It delivers increased throughput for higher revenue during peak hours. Talos features an enhanced sensor platform, increased speed, and industry-leading fraud protection.

Benefits

Superior fraud protection. Enhanced sensor platform for 10x greater note coverage and recognition

Faster transaction speed. 2x quicker than the Series 2000

Built on a proud legacy. Maintains common and understood components and functionality with the Series 2000

Easy updates and configuration. Reduce at-machine update time with USB connectivity

Decrease service calls and increase machine uptime. Powered by CPI Synq™ module compatibility

Specifications

Variants

T7: Vending

- Vending Bill Validator
- Suited for bottling and full line
- Connected Cash enabled (when used with Synq and Simplifi Mobile app)

- Mid-entry – refreshed version of the Series 2000 “VFM” bezel
- Existing Series 2000 bezels

Cashboxes

- Updated 500-note cashbox
- All existing Series 2000 cashboxes

Accessories

CPI Synq

Eliminate unnecessary service calls and reduce downtime with CPI Synq—the vending industry’s first cash hardware connectivity solution. This mobile connectivity module communicates live payment system data via the Simplifi mobile app to help operators track and monitor device health.

Providing powerful insights into the payment system, Synq is the key to eliminating unnecessary technician visits by instantly identifying commonly misunderstood payment device problems.

When paired with the Simplifi mobile app, Synq allows users to use step-by-step troubleshooting and videos to help repair payment devices without the help of a technician. This internal connectivity solution is compatible with Gryphon, Talos, and the Simplifi mobile app.

STS Advance™

STS Advance™ provides operators with flexibility and control on machines that have SC family products integrated. It supports a full range of configuration and software update functions with user-friendly software and handheld tools so you can:

- Reconfigure new/multiple currency software and configuration data
- Monitor the performance of your Cashflow field base
- Collect unit performance and report audit data
- Support PPM and PPM Advance

STS Advance is designed to be user friendly with minimal training. You can meet your unique support needs quickly and easily.
