I really like the pre-pay function. I added the option that automatically adds credit from the customers credit card. This creates more revenue in my account and provides powerful insights relating to spend volumes and frequency.

It's nice to get rewards like a free snack.

Plus I like getting more stars. I can also see my favourite purchases which makes it so easy to shop with the app.

The portal allows me to reward everyone or individuals, so marketing is very targeted. The purchase pattern data helps me to select the most relevant rewards.

This increases customer spend.
