

# JetScan iFX<sup>®</sup> Check and Currency Scanner Framework for 1-Pass Deposit Processing

## Streamline operations for large-scale check and cash processing

Every second counts when you are operating a processing center on razor-thin margins. Eliminating seconds from tasks that are repeated hundreds of times each day yields substantial cost savings over the course of a week, quarter and a year. The JetScan iFX<sup>®</sup> scanner with 1-Pass Deposit Processing eliminates the need for dual work flows to process cash and checks, transforming your operation and adding significantly to your bottom line.

JetScan iFX scanner with 1-Pass Deposit Processing is a unique solution developed specifically for organizations that process large volumes of cash and checks. Its flexible design can be customized for individual applications, maximizing your return on investment.

JetScan iFX processes deposit items at 400 documents per minute, and unlike slower check scanners, is the only scanner that processes both checks and cash. Its cash-processing speed is an industry-leading 1600 bills per minute. That's 20% faster than any other currency scanner. And this one, easy-to-use device performs reliably day after day, with 99.99+% accuracy.

Benefits you'll realize include:

- **Time savings** due to increased throughput and no document transition between operators

A single operator can process the entire deposit, eliminating the need to separate cash and checks into different work flows.

- **Reduced errors and post processing corrections** due to improved read rates on virtualized media (cash-in tickets, deposit slips)
- **Cost saving and space saving** due to the elimination of printed cash-in and deposit slips
- **Lower maintenance costs and workspace requirements** from using a single, more reliable device
- **Simplified implementation** with no changes needed to existing cash and check deposit-handling applications

### Stop separating cash and checks

Now you can stop separating cash and checks into different work flows. JetScan iFX lets a single operator process the entire deposit. The deposit slip, cash

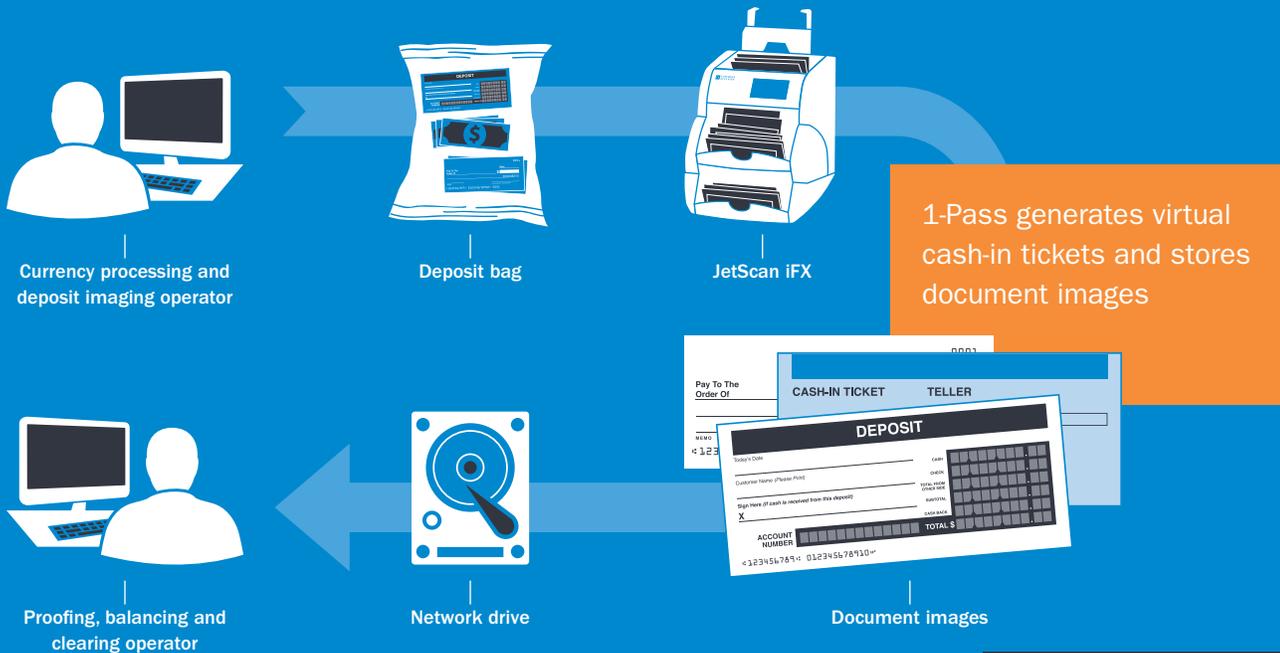

and checks are processed by the JetScan iFX, which automatically switches to the correct processing mode. Cash and check deposit totals are verified individually and images are stored on a network drive. Images can then be imported by the image processing application for proofing, balancing and clearing.

Valuable seconds saved on every transaction add up throughout the day, week and year – translating to a bigger bottom line.

### Picture improved operations and throughput

JetScan iFX with 1-Pass Deposit Processing eliminates multiple devices and multiple steps in the process. Operator training is fast and easy. There's no need to store multiple replacement units or waste

## JetScan iFX with 1-Pass Deposit Processing

valuable time exchanging machines because JetScan iFX has excellent, proven reliability. Plus, your operators get more done on a shift due to its speed and accuracy.

The JetScan iFX scanners are used by thousands of financial institutions around the world. Support for the device

is ensured by hundreds of local service professionals who know how to keep your operation up and running. If you are looking at change that significantly impacts your bottom line, consider JetScan iFX with 1-Pass Deposit Processing.
