SEAMLESS INTEGRATION
INSTANT AUTOMATION

For independent retailers and their customers, the future of payment automation is now. Introducing Paypod – our newest point-of-sale innovation for the retail market.

PAYPOD PAY STATION

Paypod combines three highly-engineered technologies into one easy-to-install system that delivers the ultimate ease in payment automation. A single unit houses a coin recycler and a note recycler that interface with POSlinq™ software to instantaneously connect with any Windows® point-of-sale system.

Designed to meet retailers' unique business needs, Paypod comes in two distinct models that offer flexibility and modularity to our customers. The result is a payment solution that contains everything you need for same-day installation, and backed by the security and support of CPI.

IDEAL FOR INDEPENDENT RETAILERS

FOCUS ON PEOPLE, NOT ON PAYMENT

Change the way you manage change with Paypod:

- Minimize time spent handling cash

- Reduce shrink by securing cash with a multi-point locking system

- Eliminate hygiene concerns by eliminating the need for cashiers to handle money

- Deploy instantly with easy interface to any Microsoft® Windows point-of-sale system

- Position your business for the future with a system designed to evolve with technology

- Utilize data analytics to make informed business decisions*

- Deliver a high level of service by remotely accessing deployed Paypod pay stations*

POSLINQ MAKES CONNECTION EASY

CONNECT WITH US

Every Paypod includes our unique POSlinq interface software.

POSlinq instantly connects any existing Windows POS system to CPI cash automation devices – no development work required.

POSlinq software scans the POS screen to confirm the payment due. The software validates the incoming cash from Paypod, and controls the release of change to manage the entire transaction.
