# PAYPOD™ PAY STATIONS

PAYMENT AUTOMATION IN LESS THAN ONE HOUR

Technical Specifications

SEAMLESS INTEGRATION

FAST & FLEXIBLE INSTALLATION

For independent retailers and their customers, the future of payment automation is now. Introducing Paypod – our newest point-of-sale innovation for the retail market.

Paypod combines three highly-engineered technologies into one easy-to-install system that delivers the ultimate ease in payment automation. A single unit houses a coin recycler and a note recycler that interface with POSlinq™ software to instantaneously connect with any Windows® point-of-sale system.

Designed to meet retailers' unique business needs, Paypod comes in two distinct models that offer flexibility and modularity to our customers. The result is a payment solution that contains everything you need for same-day installation, and backed by the security and support of CPI.

TECHNOLOGY POWERED BY INNOVATION – HARNESS IT

At Crane Payment Innovations, we are revolutionizing the payment experience for our customers worldwide. With the industry's most extensive range of premium note and coin validators and recyclers, coin hoppers and dispensers, and software applications, our technologies offer the highest level of security with the lowest maintenance and labor costs.

WORLD CLASS SUPPORT

CPI partners with more than 500 OEMs, distributors and authorized service centers across the globe to deliver the industry's most robust customer support network. Our team of experts are ready to support Paypod installations to ensure our partners have a seamless experience.
