CPI CONNECTED PLATFORM

EXPERIENCE CONNECTIVITY

INDEX

REAL-TIME CONNECTIVITY HAS ARRIVED

JOIN US

With CPI's connected platform for gaming, you'll transform your business with smart, intuitive tools engineered exclusively for the needs of gaming operators worldwide.

Your success is our priority

Partner with us, and you'll unlock new opportunities to delight your players, become more operationally efficient, and maximize your profitability.

Our platform is flexible, and we'll work with you to deliver:

- Acceptance of any payment type – now and in the future
- Real-time operational tools for faster, smarter, and more profitable decision-making
- A technology roadmap created in collaboration with other industry leaders

Our focus is innovation

- **8%** annual investment in R&D
- **650+** groundbreaking patents
- **30+** trade secrets
- **400+** highly skilled engineers
- **1 million** live connections
- **4 billion** transactions every week
- **40 million** cashless transactions every month

01

IT'S CASH

ONLY SMARTER

Time after time, CPI has proven that cash doesn't have to be difficult or expensive to manage. Now, by connecting our payment devices, we're elevating the experience once again.

UNLEASH THE TRUE POWER OF DATA

BECAUSE EVERY TRANSACTION COUNTS

DISCOVER CONNECTED CASH WITH CPI

Your payment systems are full of smart sensing technologies that capture thousands of unique data points from each and every transaction. We provide the means to harness that data, make sense of it, and transform it into powerful insights for your business.

HOW IT WORKS

Getting connected is easier than you think, especially if you already use our SC Advance™ banknote validators. All it takes is a simple hardware extension, a network connection, and the right set of software tools to turn data into action.

The Hub

Our connectivity hub collects and communicates live data directly from your payment systems and machines. Integration with your SC Advance banknote validators is fast and easy.

The Network

We can bring your devices online any way you want. Our connectivity hub will enable any type of network connection – from Ethernet to cellular, or even WiFi.

The Tools

Our advanced analytics and business intelligence tools tackle your incoming data in real time, so you can make faster, smarter, and more profitable business decisions.

PROACTIVE MAINTENANCE OPPORTUNITIES

MAKE MACHINE DOWNTIME A THING OF THE PAST

We envision a world without downtime. And we're creating the tools to bring our vision to life, starting with live alerts and actionable insights through our real-time dashboard. With our connected platform, you'll know exactly where to go and what to do to keep your floor running at 100%.

- Know when to expect and schedule emergency drops
- Turn routine trips to the machine into preventative maintenance opportunities
- Optimize the performance of your machines and peripherals
- Enable remote software updates

PREVENT PROBLEMS BEFORE YOU NEED TO FIX THEM

Keep your finger on the pulse of your machines

Set customized payment performance levels for features like acceptance rates, so you'll always know how your machines are working for your players.

Sustain the industry's highest level of performance

Our bill validators are self-calibrating and require hardly any maintenance to run without issue for years. Know when it's time to perform preventative upkeep by receiving alerts when dirt begins to build up on your cashbox light bars.

Take the "emergency" out of emergency drops

Receive an alert when any cashbox is close to capacity, and send a team to drop the cash before your game goes down. Trust us, your players will thank you.
Combat fraud like never before

If players attempt to use suspicious banknotes at the game, our bill validators will reject them immediately. We will alert you the moment this happens, so you can eliminate the risk of taking these notes at less secure cash entry points, including tables and cages.

CONNECT WITH YOUR PLAYERS

LIKE NEVER BEFORE

Gain play-by-play insight into how your players interact with games, and you'll discover new ways to keep them engaged and coming back for more. We provide the infrastructure to pull essential session data and package it in a way that helps you understand exactly how to take action.

- Identify your players' favorite games by diving deep into the way they behave at the machine

- Target players with their favorite games to improve your topline gaming revenue

- Monitor and optimize the floor position of your most profitable machines

- Offer non-cash payment options as regulations change, so players can pay with what they prefer to carry

03

BE FUTURE-READY

TODAY

A connected platform does something that one single product cannot. It leaves room to add solutions, expand capabilities, and bundle the specific elements you need to get the most value out of your investment. Today, tomorrow, and beyond.

Store additional data
through SD card slot

Enable mobile and
contactless card payments
through BLE / NFC connection

Receive power through
banknote validator harness

BE CONFIDENT IN WHATEVER COMES NEXT

The payments landscape is continually evolving, but with CPI you won't be left behind. We create paths to future technologies that build upon your previous investments, and our platform is designed for maximum adaptability.

Our connectivity hub features ports to enable new connections and revenue streams as regulations, currencies, and technologies change.

CONNECT YOUR SC ADVANCE BANKNOTE VALIDATOR

Connect to your
Ethernet network

Connect
via WiFi
or cellular
networks

Connect to other peripherals
or the second SAS port

Add connection
points via USB port
for future expansion

PAYMENTS ARE CHANGING

ACCEPT IT

Consumers are not restricted to using banknotes and coins in their day-to-day lives anymore. Most carry cards with them. Some even prefer to pay through their mobile and wearable devices.

It won't be long before gaming regulations allow for a wider range of payment options at the game.

With CPI, you'll be prepared. Our platform can enable any type of payment, ensuring you'll always have a way to accept your players' cash and maximize revenue streams.

DID YOU KNOW?

Gaming isn't the only industry powered by CPI technology, and cash isn't the only form of payment we accept. Our technology powers more than four billion cash, card, and mobile transactions per week across five global industries.

We continually leverage this experience and work with our partners to open a whole new world of payment possibilities in gaming as the regulatory environment evolves.

LAY THE GROUNDWORK FOR FUTURE GROWTH

ASK US HOW

Our platform is built to expand, and we're continually working to provide an even wider range of solutions that will deliver growth, profitability, and results to our customers.

Join us, and we can help you take advantage of whatever comes next

- Facilitate non-cash payments to increase player engagement and promotional opportunities right at the point of transaction
- Connect to table games and other areas throughout your business, including retail and hotel

- Connect to other slot machine peripherals to monitor and maximize performance
- Enable remote software updates, and ensure your games and peripherals are compliant with the most recently approved firmware

- Leverage live heat maps and player behavior analytics to optimize floor placement of your most profitable machines
- Integrate with third-party business intelligence providers
- Integrate our platform with your loyalty program wallet

04

THE INDUSTRY'S TIGHTEST SECURITY

FROM YOUR TRUSTED PARTNER

At CPI, we take security seriously. So while you're focused on optimizing your business, we're focused on protecting it.

Partner with us, and you'll have total peace of mind knowing that your revenue and slot floor data are in safe hands.

WE BUILD, CONNECT AND PROTECT

LIKE NO ONE ELSE

One line of defense is not enough to secure your business. At CPI, we go beyond the mechanics of our hardware to deliver multi-layered protection against threats.

- Threat intelligence
- Data protection
- Suspicious banknote detection
- Real-time security alerts
- Player behavior analytics
- Intranet filtering protections
- User access and authentication controls
- World-class cyber security

- Intrusion detection and prevention
- Advanced breach detection systems
- Patented security algorithms
- Encrypted communications
- AppSec
- Rapid response team
- Anti-stringing

We also have the infrastructure to put new safeguards in place. Ask us how we can support your anti-money laundering initiatives and strengthen your responsible gaming programs.

Partner with us, and discover why the world trusts CPI to reliably process more than four billion transactions per week across 143 different currencies.

05 CRANE CONNECTIVITY SOLUTIONS

SIMPLIFY YOUR CONNECTIVITY TECHNOLOGY

EXPLORE OUR CAPABILITIES

PARTNER WITH US

Crane Connectivity Solutions (CCS) is the engineering center of excellence behind CPI's connectivity portfolio. We have assembled the industry's best and brightest engineers to focus on delivering a simple and seamless technology experience to our customers. Bringing together the engineering teams from CPI and Crane Merchandising Systems, we have created the industry's most robust connectivity platform.

In keeping with our commitment to remain at the forefront of innovation, this platform extends our technology beyond cash payments to transform your business in the machine-connected environment.

From concept to implementation, we'll lead you through the connectivity process. From hardware installation and enterprise software optimization, to ongoing global field support and consulting, our technical experts will get you up and running – and make sure you stay that way.

As technology continues to evolve, consumers' wallets are more diverse than ever. With CCS at your side, your business is prepared to grow and capture every payment opportunity.
