

THE TOP 10 REASONS TO

AUTOMATE COIN DISPENSING

High cash use, long lines at peak times and unexplained cash losses are daily challenges of quick-serve restaurants.

But they don't have to be.

Automate change dispensing, accelerate service and improve your bottom line with the T-Flex™ Coin Dispenser.

1. FASTER SERVICE

Delivers change to the customer in under 1 second – faster than any cashier can count out the coins.

2. REDUCE SHRINK

Shrink happens. Technology can help. Automate change dispensing and take control of your profits.

3. MINIMIZE MISTAKES

Delivers accurate change every time, eliminating cashier errors.

4. ELIMINATE BOTTLENECKS

Holds enough coins to service up to 250 cash transactions before refilling.

5. INCREASE CUSTOMER THROUGHPUT

Faster processing means serving more customers during peak hours.

6. **FASTER SHIFT CHANGEOVER**

By reading the calibration strips on the canister, you save 5 minutes per cashier at every shift changeover or closeout.

7. **FRIENDLIER CUSTOMER SERVICE**

There's more time to interact directly with the customer when the cashier only needs to count out the bills.

8. **HIGHER OPERATIONAL EFFICIENCY**

High capacity coin canisters in the T-Flex reduce the number of times coins need to be counted for higher efficiency on a daily basis

9. **AVOID WALKAWAYS**

When customers see long lines, they tend to move on. The T-Flex reduces each cash transaction by 5 to 8 seconds, allowing more customers to be served and reducing the lines.

10. **QUICK RETURN ON INVESTMENT**

Our customers tell us the T-Flex pays for itself in under 3 months by reducing shrink, saving labour, and improving customer throughput.

ABOUT CRANE PAYMENT INNOVATIONS:

Combined as one company, CPI offers the most extensive range of premium bill and coin validators and recyclers, coin hoppers and dispensers, plus software applications. All our products and technologies offer the highest level of security and fast acceptance rates, with low maintenance and labor costs.
