

Tornado Coin Counter & Packaging System

- Unmatched quality and performance in a coin counting and packaging system.

Cummins Allison Coin Counting & Packaging System

Designed for reliable, productive coin processing, the Tornado coin counter incorporates many features for easy operation and maintenance. Construction is unmatched, ensuring long life, and is simple to use while providing the most advanced features. The advanced control panel also ensures that the machine can be customized to meet your individual needs and preferences.

The Tornado is the perfect machine to meet your coin counting needs.

Benefits of the Cummins-Allison Tornado Coin Counter

Easy to Use

With the exclusive patented universal adjustment mechanism, there are no more adjustment knobs! You can now easily set diameter and thickness with a single action. Eliminate the need for panel markings and coinage-dependent parts.

Always Tailored to your Needs

By using the Tornado Coin Counter's programmable settings, you can tailor many non-volatile settings to meet different needs and expectations. Change different settings with the control panel, saving time and minimizing errors.

Reduced Sorting and Counting Time

With a name like the Tornado, you should expect this machine can count and sort coins quickly. The Tornado can count more than 3,200 coins a minute, and has an exclusive automatic jam-clearing mechanism that ensures continuous operation.

Increase Count Accuracy & Eliminate Human Error

With the count sensor, built-in white-light LED and automatic jam-clearing mechanism, you can trust the Tornado to provide a high level of accountability. Bag overflow detection avoids over-filling of coin bags, and over count detection ensures that counts are accurate.

Built to Last

Using only high-end parts and quality construction, the Tornado is built especially for heavy duty use and long life expectancy. As your needs change, the Tornado can adapt to meet those needs. The built-in maintenance aids means that the cost of ownership and operation stays low.

Foot Pedal Accessory:

For the ultimate in productivity, the foot pedal accessory (sold separately) was developed to keep the Tornado working continuously.

Automatically Rolls your Coins:

With the use of coin packaging tubes, coins are dispensed to a preset number of coins into a paper coin wrap. This allows you to recycle your coins, saving on fees for coin deposits and rolled coin purchases.

Automatically Bag your Coins:

Can be used as a sorter by setting for the largest size coin to be counted. Coins of the selected denomination are counted into a bag affixed to a front bag adapter and smaller sized coins are offsorted into a side cup.

SPECIFICATIONS

Tornado Coin Counter

Counting Speed: up to 3,200 cpm

Coin Size: 15 to 38mm diameter

Value Display: 9 programmable denominations

Batch: 0 predefined stops (1 to 999,999)

Key Features:

- Exclusive universal adjustment system
- Automatic jam-clearing mechanism

Counter Features:

- Voltage Rating: 220 VAC – 50 Hz. or 110 VAC – 60 Hz.
- Power: 90 W approx.
- Weight: 23Kg
- Dimensions (WxDxH): 323 x 500 x 235mm
- RS232 Interface

Counter and Displays:

- Counter: 6 digits (extended to 12 digits)
- Value: 8 digits (extended to 16 digits)
- Totalizer
- Batch and bag counters

Optional Accessories:

- Automatic Hopper - Approximately 7,000 coin capacity
- External display
- External keyboard
- Foot pedal
