

Cash Documentation Solution for Law Enforcement

Count cash, capture serial numbers and quickly reclaim buy money with the JetScan iFX® series money counter

Document seized currency in minutes

The JetScan iFX® currency scanner revolutionizes the way law enforcement agencies process and document currency. Only Cummins Allison offers a complete solution that quickly counts, records serial numbers, and captures snippets or full note images of mixed bills. What's more, a digital record of every note can be instantly exported to a database for the ultimate in serial number management. Alternate methods of currency documentation take up valuable time and resources – with the JetScan iFX, thousands of dollars can be counted and properly documented in minutes.

Save time and resources

Never photocopy a bill again – the JetScan iFX counts, records and images up to 1,200 notes per minute. The date, case number, denomination, serial number and other valuable information are all available in easy to recall reports.

Prepare buy money faster

Capture the serial number of every note before making a drug buy. Use Image Management Software (IMS) to instantly compare seized money against the cash used in the drug buy.

Get buy money back quickly

Don't write off your buy money or use valuable resources to get buy money back inefficiently. The Doc Find feature scans for your seed money while you process the seized cash, so you can pull it out right on the spot and get it back into your budget.

Earn interest income

Some jurisdictions allow agencies to deposit confiscated currency if properly documented. The JetScan iFX provides admissible evidence of the seized currency, which can then be deposited and start earning interest.

Document seized currency

The JetScan iFX provides a quick and accurate record of all seized cash. The portable unit can even be carried to the scene to provide a complete chain of evidence.

JetScan iFX 100 features

Mixed bill processing - The JetScan iFX counts up to 1,200 mixed bills per minute – identifying the denomination of every bill.

Full note capture - Capture and transfer the full image of every note to Cummins Allison's Image Management Software (IMS) or other database. High resolution images (200 DPI) can be recorded and stored for evidence or later comparison.

Serial number capture - Record serial number data at up to 1,200 bills per minute. No presorting or facing is required.

Counterfeit detection - The most advanced counterfeit detection in the industry is available on the JetScan iFX. Cummins Allison patented sensors and analytic software analyze each bill, catching counterfeits that other systems miss.

Blind deposit - The JetScan iFX can be configured to conceal the total currency value from agents when processing seized money, meeting the currency handling guidelines of some agencies.

“It gives us more time to spend going after the drug dealers rather than sitting in the office counting and photocopying money.”

John Soprano, Northeast Regional Director, Pennsylvania Office of Attorney General Bureau of Narcotics Investigation

Get your buy money back into your budget faster

The Doc Find feature on JetScan iFX lets agencies get their buy and seed money back into their budgets right away. No more separating by hand and no more writing it off as an expense and losing it for good.

Doc Find searches for serial numbers of buy money, stops right on the correct bills, and lets you pull them out on the spot. What would take prohibitive time and resources now takes one person a fraction of the time.

1. Issued money is scanned, and a digital record is automatically created in IMS or other database.

2. An agent uses the issued money to purchase drugs or other illegal items.

4. All seized currency is scanned with the JetScan iFX, any serial number matches are flagged in IMS or other central database. Doc Find lets you pull out the buy money, returning it right back to the agency for the next sting.

3. Suspects are arrested and currency is seized.

Note Details		Generate Charge Back Form
Device Name	FX3PM	
Currency	USD	
Denomination	20	
A		
B		GB32531085A
C		
D		
Batch	15

Start Time	4/25/2011 3:31:16 PM	
End Time	4/25/2011 3:31:19 PM	

Advanced search capabilities

Search by serial number, case number, agents or date to find processed notes and quickly generate reports. Once a serial number is identified, IMS shows the name of the JetScan iFX device that processed the note, the date the note was processed, transaction information (such as case number) and the serial number with the full-note image.

Batch Comparison Results

Batch comparison

Compare the serial numbers in two or more batches to find exact matches. Compare batches of buy money with batches of seized money.

JetScan iFX cash documentation solution

Standard features

Four levels of memory: Keeps separate totals for: sub-batches, batches, day totals and strap limits.

Unit/value display: Totals can be shown as dollar value or unit counts.

Adjustable strap stops: Separate strap stop limits for each denomination.

Verification: Allows currency to be counted or recounted without changing day totals.

Add function: For cumulative counting when desired.

Feeder type: Automatic feeder with auto-sensing document detection.

Transport: High-volume straight-through transport path.

Interface/communications: USB, RS232 and Ethernet.

Options and accessories

Serial number capture: Capture, OCR and record serial numbers at 1,200 bills per minute.

Snippet and full note capture: Capture serial number image snippets or the entire bill to use in evidence logging and prosecution.

Doc Find: Pull buy money out of seize money significantly faster and get buy money back into the agency budget right away.

Optionally, print a detailed report of denomination totals and serial numbers.

Image Management Software (IMS): Store images of bills for archiving without having to store physical copies. Store serial numbers of buy and seize money and compare lists for verification.

Suspect note detection: Machines are equipped with a range of counterfeit detection technologies that individually and collectively screen out suspect documents, including: magnetic, fluorescent, ultraviolet, infrared and proprietary detection techniques.

Printers: High-speed impact and thermal printers available.

Remote display: 6- or 12-digit LED display showing count totals.

Specifications

Feeder capacity: 500 documents.

Exit pocket capacity: 200 documents each pocket.

Document size: Height: 2.41" to 4.0".
Length: 4.5" to 8.75".

Dimensions: 9.5" H (without hopper) x 13.5" W x 13" D.

Weight: 20 pounds.

Display/controls: 4.3" color touch screen.

Power: 105-253 VAC, automatic switching, 50/60 Hz.

JetScan iFX i200 series with two fully functional pockets for non-stop processing also available.

Currency processing specifications

Denominations scanned: USD: \$1, \$2, \$5, \$10, \$20, \$50 and \$100. Also scans CAD, MXN and other currencies. See web site for current list.

Adjustable processing speed: 600, 800, 1,000, 1,200 and 1,600* notes per minute.

*Serial number capture not available at 1,600 notes per minute.

Cummins Allison Image Enhancement Technology: Digitally smooth out wrinkles from the image and align skewed notes and snippets.

Accuracy: 99.99%.
